

Why upgrade to Documentum 6.5?

Keeping up with the latest version of EMC Documentum can be difficult. But it does have significant advantages.

What's in it for you?

The latest version, 6.5, has many usability improvements which end-users can benefit from. Here are just a few:

- ★ A new product, **MyDocumentum for Outlook** provides users with a seamless, function-rich interface for managing emails in a Documentum repository.
- ★ **MyDocumentum Offline** is also new to version 6.5; this allows users to interact with information whether they're connected to a Documentum repository or not.
- ★ The Webtop user interface has been streamlined to more efficiently respond to user requests. There are less page refreshes and the upload and download process performs better.
- ★ Documentum's Web Content Management suite now has a new interface, called Page Builder, enabling more features and greater control over your web content.

If you'd like to know more about Documentum 6.5 features and what they mean for you, [contact Astral now](#).

Did you know? Your version of Documentum may already be unsupported. Without vendor support, it is difficult to overcome technical problems. Upgrade now to ensure you're fully supported.

Are you ready?

Upgrading Enterprise systems is usually a complex process. Careful planning, rigorous testing and clear communication to the wider community are essential. With Astral's extensive experience in Documentum upgrades, we can help you to define a strategy and effectively plan for a system upgrade.

How Astral can help

- ★ **We know the technology:** Astral consultants are accredited and experienced in all versions of Documentum, and have successfully completed countless version upgrades.
- ★ **We'll make sure it's worth it:** We evaluate the benefits and ensure the effort to upgrade provides real returns.
- ★ **You'll know what to expect:** We'll make sure your stakeholders understand what business benefits can be delivered, and what the impacts are.
- ★ **We've done it (many times) before:** We understand the careful planning required, the complexities and implications of performing a system upgrade.
- ★ **We'll plan and test it together:** Your technical staff will be mentored and supported through the upgrade process, so they can better understand the new version and its features.
- ★ **Take advantage of the new features:** Astral will train staff on how to take advantage of any new or updated features.

Trust the experts. Contact Astral today to discuss your strategy for upgrading.

About Astral
